

"GOVERNMENT EXPERTS" ?

WHAT A FARCE !

The long, long parade of sycophant "government experts" trained, willing and pressured by the CIA and/or the FBI to LIE AND PERJURE themselves at will by whatever opinions and false testimony may be ordained by their superiors, continues without end in the matter of review of the evidence in the John F Kennedy assassination, long hidden away under lock and key by CIA/FBI pressure.

FOOLS, and the politicians who also are FOOLS beholden to the sacrosanct CIA and the nation's MILITARY JUGGERNAUT, may accept - or pretend to accept - such pre-dictated findings by so-called "government experts" as authentic, but the widespread public knowledge of the "hard evidence" to the contrary known to exist, can only accentuate the already great and growing distrust of our present system of government itself and all its present and recent political leaders.

Those in politics who have thrived in the past by the all-pervading LIES AND PERJURIES of high government officials and agencies in their public announcements, will assuredly be "hoist by their own petard" in days to come, UNLESS the detailed evidence upon which these pretended "experts" based their conclusions is also made public in detail for all the world to see. Judgements by questionable "experts" of unknown integrity and based entirely on concealed evidence, properly carry no weight in circumstances such as these.

Hopefully the unsupported conclusions of these so-called "government experts" will be quietly laid to rest under a few

tons of the EXPERT MANURE they have generated among the politicians; and the evidence they claim supports their conclusions will then be thrown open to REALLY QUALIFIED EXPERTS - NOT ON THE GOVERNMENT PAYROLL. THEN, and only then, will the nation be able to judge the merits of contending "expert" judgements and learn the TRUTH of what actually happened.

If the Rockefeller Commission stoops so low as to accept the suspect testimony of so-called "GOVERNMENT EXPERTS" without further question and development of the underlying "hard evidence" which is alleged to support that testimony, it will justly share the ignominy and ill-repute of the Warren Commission among the informed which its appointed membership must share, and will fully deserve to receive burial under the same MANURE PILE as the so-called "GOVERNMENT EXPERTS" through whom they sought to conceal the ugly facts from the nation.

- John H. Latta, C.P.A. (Ret.)
